	REGULATIONS DEFINING THE SCOPE OF THE PROFESSION OF PHYSIOTHERAPY (R2301 – 3 DECEMBER 1976)					
SCHEDULE						
	GENERAL RULES GOVERNING THE SCALE OF BENEFITS					
001	Unless timely steps (i.e. 24 hours prior to the appointment) are taken to cancel an appointment the relevant fee may be charged, but shall not be payable by medical schemes. Each case shall, however, be considered on merit and, if circumstances warrant, no fee shall be charged. Modifier 0001 to be quoted.					
002	In exceptional cases where the fee is disproportionately low in relation to the actual services rendered by the practitioner, the practitioner shall provide motivation for a higher fee and such higher fee as may be agreed upon between the practitioner and the scheme may be charged.					
003	Where a practitioner uses equipment which is not owned by that practitioner, a reduction of 15% of the relevant rate will be applicable. Modifier 0003 must be quoted when this rule is applied.					
004	In the case of prolonged or costly treatment, the practitioner should first ascertain from the scheme concerned whether it will accept financial responsibility in respect of such treatment, since the member may be subject to maximum annual benefits.					
005	After a series of 20 treatments in respect of one patient for the same condition, the practitioner concerned shall report to the scheme as soon as possible if further treatment is necessary. Payment for treatments in excess of the stipulated number may be granted by the scheme after receipt of a letter from the practitioner concerned, motivating the need for such treatment.					
007	Practitioners are reminded that a lower fee than that appearing in the scale of benefits shall be charged if the customary fee in the area is less than that charged. Reduced fees shall also be charged where the practitioner would have reduced his/her fee in private practice in particular cases. Prolonged treatment or exceptional cases should also receive special consideration in accordance with the usual medical practice.

	<p>In calculating the GEMS Tariff, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.</p> <p>ALL GEMS TARIFFS ARE VAT INCLUSIVE.</p>										
	<p>This schedule is for the exclusive use of registered specialist radiology practices (Pr No "038") and nuclear medicine practices (Pr No "025"). "025" practices may only charge the codes with a 3rd digit of 9. "038" practices may charge all codes except codes with a 3rd digit of 9. Practitioners registered as both radiologists and nuclear physicians may charge all codes. Neurosurgeons accredited by the RSSA may charge for the neuro-interventional studies at 100% of the published radiology rate subject to preauthorisation and this excludes equipment fees or any other claims for the same event.</p>										
	<p>This schedule must be used in conjunction with the Radiological Society of S A Guidelines. Please refer to the PET guidelines in Annexure D.</p>

		CF	Units	BF	Flag	2019 values	CF	Units	BF	Flag	2019 values
	<ul style="list-style-type: none"> The vast majority of the codes describe complete procedures/examination and their use for the appropriate studies is self-explanatory Some codes may have multiple applications and their use is described in notes associated with each code Codes 00510 to 00560 (Angiography machine codes) may only be used by owners of the equipment and who have registered such equipment with the Board of Healthcare Funders / RSSA The machine codes 00510, 00520, 00530, 00540, 00550, 00560 may not be added to 60540, 60550, 70530, 70535 (Antegrade Venography, upper and lower limbs) Where public sector hospital equipment is used for a procedure, the units will be reduced by 33.33% 										
	Consumables										
	<ul style="list-style-type: none"> Contrast Medium <ul style="list-style-type: none"> Prior to the implementation of Act 90, contrast will be billed according to the official 2004 RSSA reimbursement price list, without mark up. After the implementation of Act 90, contrast medium will be billed according to the suppliers' list price, without mark up. Angiography catheters, angioplasty balloons, stents, coils and other embolisation materials, guide wires and drains are to be billed at net acquisition cost, without mark up, until the implementation of Act 90. All other consumables are to be billed at net acquisition price, until the implementation of Act 90. Thereafter Act 90 regulations apply. The cost of film is included in the comprehensive procedure codes and is not billed for separately. Appropriate codes must be provided for consumables.

	General Comments on Procedural Codes										
	<ul style="list-style-type: none"> All X-ray tomography codes are Stand-alone studies and may be used as a unique study or in combination with the appropriate regional study if done simultaneously. May not be added to 20130, 42110, 42115. Setting of sterile tray is included in all appropriate procedure codes Where introduction of contrast is necessary eg. sialography, arthrography, angiography, etc, the codes used for the procedures are comprehensive and include the introduction of contrast or isotopes. The use of Doppler or Colour Doppler as an adjunct to a study (eg small parts thyroid) is included in the code for that study. CT Angiography (10330, 20330, 32300, 32310, 44300, 44310, 44320, 44330, 60310, 70310, 70320) are Stand-alone studies and may not be added to the regional contrasted studies (see 10335, 20340, 20350, 44325 for combined studies). Angiography and interventional procedures include selective and super selective catheterization of vessels as are necessary to perform the procedures. 										
	Codes 00230 (Ultrasound guidance), 00320 (CT guidance) and 00430 (MR guidance) are Stand-alone procedures that include the regional study and may not be added to any of the ultrasound, CT or MR regional studies.

	Code 60100 (stress only) is a Stand-alone study and may not be combined with other codes. Code 60110 (tomography) may be combined with any one of the defined regional x-ray studies of the upper limb. Motivation may be required for more than one regional tomographic study per visit. Code 60200 (U/S) may only be used once per visit. Code 60300 (CT) limited study – limited to a small region of interest eg. part of humeral head. Code 60400 (MR limited) may only be used once per visit.

ANNEXURE D. PET GUIDELINES											
A. INDICATIONS											
	For the purposes of this guideline, only established indications for PET-CT are included and this relates to the more common types of malignancies as seen in practice. While some of the less common forms of cancer may also yield advantages with PET-CT imaging, there is as yet insufficient published data to support the general use and these have been excluded in the list below. This situation may change as new research and information becomes available.										
	<ol style="list-style-type: none"> 1. Non-small cell lung carcinoma (NSCC) <ol style="list-style-type: none"> a) Primary diagnosis of lesions <ol style="list-style-type: none"> i. >10mm diameter lesions where conventional imaging and biopsy have been inconclusive. b) Staging especially where curative surgery is planned <ol style="list-style-type: none"> i. Evaluation of primary tumour (T-stage). ii. Suspected nodal disease or characterization of nodal disease iii. Suspected distal metastases of determining extent of metastases. iv. Solitary distal metastasis where metastatectomy is considered. PET-CT is used to exclude additional lesions which would preclude surgery. c) Investigation of suspected recurrence (restaging) <ol style="list-style-type: none"> i. Local or regional recurrence ii. Nodal or distal recurrence iii. Determine the extent of proven recurrent disease iv. Differentiate fibrotic mass from active disease d) All patients with proven carcinoma of the lung, who are considered for curative resection, should be imaged with PETCT prior to surgery. e) Current available literature confirms that PET-CT is more accurate than CT or PET alone for staging and restaging of NSCC.

10.	Melanoma a) No role in primary diagnosis which is primarily a surgical/histological diagnosis. b) Staging is determined by depth of penetration of the primary tumour and presence of sentinel node at surgery. i. Indicated for Stage 3 and 4 disease where there is a high incidence of distal nodal and metastatic disease. ii. Solitary distal metastasis on conventional imaging where metastatectomy is considered. PET-CT is used to exclude additional lesions which would preclude surgery. iii. Overall N and M staging is significantly more accurate than conventional imaging (97% vs 80%). c) Investigation of recurrent disease (restaging) i. Modality of choice for recurrent nodal and distal metastatic disease. ii. Differentiate post therapeutic fibrosis from recurrent or residual disease. d) PET-CT may alter management in up to 34% of patients with Stage III and IV disease.

GENERAL RULE GOVERNING ULTRASONIC EXAMINATIONS DURING PREGNANCY		
	<p>Ultrasound examinations: The international norm approved for use in South Africa for NORMAL PREGNANCY is two ultrasound exams:</p> <p>(a) The first scan should preferably include a nuchal thickness estimation and be performed between 10 and 14 weeks gestation. The second scan should be performed between 20 and 24 weeks and should include a full anatomical report. All subsequent ultrasound scans are excluded from the benefits of medical schemes unless accompanied by proper motivation. An ultrasound scan to assess an abnormal early pregnancy may be formed before 10 weeks but this scan may not be used to diagnose a normal uncomplicated pregnancy. Item 3618 is a gynaecological scan and its use is not approved for use in pregnancy.</p> <p>(b) In cases where the scan is performed by the attending practitioner, a clear indication for such a scan must be entered on the account rendered, or a letter of motivation must be attached to the account (the practitioner must elect one of the two options).</p> <p>(c) In case of a referral, the referring doctor must submit a letter of motivation to the radiologist or other practitioner doing the scan. A copy of the letter of motivation must be attached to the first account rendered to the patient (by the radiologist or the other practitioner doing the scan) and must be attached to the first account submitted to the medical scheme by the patient or the doctor, as the case may be.</p> <p>(d) In case of a referral to a radiologist, no motivation should be required from the radiologist</p>
