	<p>In calculating the GEMS Tariff , the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.</p> <p>ALL GEMS TARIFFS ARE VAT INCLUSIVE.</p>						
	<p>The schedule includes procedures and services for use by Oral Health Care Providers for purposes of keeping accurate patient records, reporting procedures on patients, and processing oral health care related insurance claims. The procedures are those performed by general dental practitioners, oral pathologists, prosthodontists, periodontists, orthodontists, maxillo-facial and oral surgeons and dental therapists.</p> <p>The procedures codes listed in the schedule have, for the convenience in using the schedule, been divided into categories of services, based on the branches of clinical dental practice. The procedures are grouped under the category of service with which the procedures are most frequently identified and should not be interpreted as excluding certain categories of Oral Health Care Providers from performing such procedures. Individual procedure codes consist of a procedure code, procedure description (nomenclature), and when necessary, a descriptor, that provides further definition and/or guidelines to clarify the intended use of the procedure code.</p>

005	<p>Procedure accompanied by unusual circumstances:</p> <p>In exceptional cases where the proposed fee/benefit is disproportionately low in relation to the actual services rendered by a practitioner, such higher fee as may be mutually agreed upon between the dental practitioner and the patient/medical scheme may be billed. Use Modifier 8011 with a narrative description.</p> <p>Under certain circumstances a service or procedure is partially reduced or eliminated at the practitioner's election. Under these circumstances a lower fee may be billed. The service provided can be identified by its usual procedure code and the addition of Modifier 8012, signifying the service is reduced.</p>						
B.	GENERAL CODING RULES						
006	<p>The schedule does not prescribe the scope of practice of a particular category of Oral Health Care Provider; neither does it confine the performing of procedures or services to a registered speciality. Fees listed within a column of a particular category of Oral Health Care Provider are customary fees, should the procedure or service be rendered by that provider category.</p> <p>Specialists are however encouraged to confine their practice to the speciality or related specialities in which they are registered. Specialist may charge fees for procedures or services which usually pertain to some other speciality, if such procedures or services are also recognised in their speciality, and if it is carried out only for their bona fide patients. Such fees shall not be higher than those charged by general practitioners for the same procedures or services (HPCSA, Rule 25).</p> <p>Fees for procedures or services not listed within the column of dental therapists that do fall within the field of dental therapy in terms of their scope of practice are regarded as being "by arrangement" until such fees are listed.</p>

007	Procedures not listed in the Dental Schedule						
	When a procedure is performed that is not listed in the schedule, an appropriate procedure code, listed in the NHRPL for medical practitioners may be reported.						
	Unlisted procedures. Any procedure that is neither described in the schedule, nor in the medical schedule, should be reported using code 9099 - Unlisted dental procedure or service. The fee for an unlisted dental procedure or service should be based on the fee of a comparable procedure. Code 9099 codes should not be used to report procedures where the fee is determined "by arrangement" with the patient and/or medical scheme.

009	<p>Surgery guidelines:</p> <ol style="list-style-type: none"> Follow-up care for therapeutic surgical procedures: The fee/benefit for an operation shall, unless otherwise stated, include normal post-operative care for a period not exceeding four months. If a practitioner does not him/herself complete the post-operative care, he/she shall arrange for post-operative care without additional charges. A fee/benefit for post-operative treatment of a prolonged or specialised nature may be charged as agreed upon between the practitioner and the scheme. Multiple Procedures (Maxillo-facial and oral surgery): The fee/benefit for more than one operation or procedure performed through the same incision shall be determined as the fee for the major operation plus fee/benefit for the subsidiary operation to the indicated maximum for each such subsidiary operation or procedure (Modifier 8005). The fee/benefit for more than one operation or procedure performed under the same anaesthetic but through another incision shall be determined on the fee/benefit for the major operation plus: 75% for the second procedure/operation (Modifier 8009). 50% for the third and subsequent procedures/operations (Modifier 8006). This rule shall not apply where two or more unrelated operations are performed by practitioners in different specialities, in which case each practitioner shall be entitled to the full fee/benefit of the operation. If, within four months, a second operation for the same condition or injury is performed, the fee/benefit for the second operation shall be 50% of that of the first operation (Modifier 8006).

	2. The fee for orthodontic treatment does not include a clinical oral evaluation and necessary diagnostic services. The fee for corrective therapy (i.e. codes 8861 to 8888) is an inclusive fee and no additional fees may be levied for intra-operative oral evaluations and preventive services. A pre-orthodontic treatment visit, an orthodontic retention, and an oral evaluation on completion of the treatment plan (retention phase included) are excluded and should be reported in addition to corrective orthodontic treatment as separate procedures (Code 8803 x3). Intra/post orthodontic treatment records consisting of radiographs/diagnostic images (limited to a cephalometric film and 5 oral/facial images) and diagnostic casts may be levied when a corrective orthodontic treatment plan is completed (retention phase included).						
	3. The fee for 'Fixed appliance therapy' (codes 8861 and 8865 to 8888), as determined by the individual practitioner, will be levied on a monthly manner over the treatment period (retention phase excluded).						
	4. When partial fixed appliance or preliminary orthodontic treatment (codes 8858, 8861, 8865 or 8866) is followed by full fixed appliance orthodontic treatment (codes 8873 to 8888) provided by the same orthodontist, the fees levied for the partial fixed appliance therapy or preliminary treatment will be deducted from the fee quoted for the full fixed appliance orthodontic treatment.						
	5. The total fee for multiple phases of full fixed appliance orthodontic treatment provided by the same orthodontist may not exceed the most recent fee (determined on commencement date of the final stage of full fixed appliance treatment) for the appropriate full fixed orthodontic procedure.

	6. When the patient transfers to another practitioner during treatment, or treatment is terminated for any reason, the original treating practitioner must report the number of treatment months remaining and determine the balance of the fee by applying the following formula: Total payment (for treatment only) minus 20% of the total fee (for banding - when applicable) multiplied by the percentage of treatment remaining. For example, if the practitioner was paid R 10,000.00 for a 24-month treatment plan and 18 months of treatment were completed. The balance would be R 2,000.00 (or R 10,000.00 - R 2,000.00 x 6/24). The length of the treatment plan from the original request for authorisation will be used to determine the number of treatment months remaining. The practitioner continuing treatment will provide the information stipulated in paragraph 1 above. Report code 8891 (Orthodontic transfer) with the fee that will be levied for continuation of the treatment in addition to the appropriate orthodontic treatment code. The fee for continuous treatment is subject to prior authorisation by the patient's medical scheme.						
	7. When an established orthodontic patient requires re-treatment, the information stipulated in paragraph 1 above and the cause(s) for re-treatment will be provided. Report code 8892 (Orthodontic re-treatment) with the fee that will be levied for re-treatment in addition to the appropriate orthodontic treatment code. Orthodontic re-treatment is subject to prior authorisation by the patient's medical scheme.						
011	Dento-legal fees: Practitioners are entitled to remuneration if they are present at Court at the request of an advocate or attorney. Use code 8111 (Dental testimony) to report dento-legal work. The code is listed in the adjunctive general services sections in the code lists.

	<p>Frequency of benefits.</p> <p>The South African Dental Association recommends to medical schemes, where considered necessary and appropriate, that contract limitations on the frequency of providing care for certain services be stated as "twice a calendar year" rather than once in every six months.</p>						
	<p>Radiographs and records.</p> <p>Radiographs should be taken only for clinical reasons as determined by the treating dentist. Postoperative radiographs should only be required as part of dental treatment. When a dentist determined it is appropriate to comply with a third-party payer's request for radiographs, a duplicate set should be submitted and the originals retained by the dentist. Any additional costs incurred by the dentists in copying radiographs and clinical records for claims determination should be reimbursed by the third-party payer or the patient.</p>						
	<p>New vs. established patient.</p> <p>A new patient is one who has not received any professional services from the dentist or another dentist of the same speciality who belongs to the same group practice, within the past three years. An established patient (patient of record) is one who has received professional services from the dentist or another dentist of the same speciality who belongs to the same group practice, within the past three years.</p> <p>In the instance where a dentist is on call for or covering for another dentist, the patient's encounter will be classified as it would have been by the dentist who is not available.</p>

II. DENTAL PROCEDURES AND SERVICES							
A.	DIAGNOSTIC SERVICES						
	The branch of dentistry used to identify and prevent dental disorders and disease. Includes all services/procedures available to the dentist for evaluating existing conditions and determining any further dental care that may be required.						
	CLINICAL ORAL EXAMINATIONS						
	The purpose of oral examinations is to observe and record pertinent information, past and present, necessary to arrive at a diagnosis and treatment plan (when treatment is indicated). A treatment plan is a list of procedures or services the dentist proposes to perform on a dental patient based on the results of the examination and diagnosis. Often more than one treatment plan is presented. Oral examinations may require the integration of information that is acquired through additional diagnostic procedures, which should be reported separately. The oral examination, diagnosis, and treatment planning are the responsibility of the dentist. The collection and recording of some data and components of the oral examination may however be delegated. Oral examinations and consultations include the issuing of prescriptions where medication is required.						
8103	Extensive oral examination – condition focused combined consultation for complex treatment planning	R 303,70	R 303,70	R 303,70	R 303,70	R 303,70	
8105	Case presentation – extensive treatment planning Use this code for the presentation of a treatment plan to a patient as a result of an extensive oral examination (Code 8103) and treatment planning (e.g. orthognathic case presentation to the patient and family). 	RADIOGRAPHS/DIAGNOSTIC IMAGING						
	<p>Diagnostic radiographs/diagnostic images include interpretation.</p> <p>Radiographs/diagnostic images should only be taken for clinical reasons as determined by the dentist and practitioners should comply with the Regulations concerning safe radiological practice and take the necessary precaution to minimise radiation of patients. Radiographs/diagnostic images are part of the patient's clinical record, should be of diagnostic quality, properly identified and dated. The dentist should retain the original images and only copies should be used to fulfil requests made by patients or third party funders.</p> <p>A complete series of intra-oral radiographs/images for diagnostic purposes is required once per treatment plan only. A second series may be required in exceptional cases e.g., following periodontal surgery. The same applies to panoramic films, where additional films may be required for follow-up/re-evaluation purposes.</p> <p>Diagnostic radiographs/diagnostic images preceding endodontic treatment, periodontal treatment, the surgical extraction of teeth or roots and fixed prostheses are fundamental to ethical clinical practice.</p>

C.	RESTORATIVE SERVICES						
	<p>The branch of dentistry that deals with the reconstruction of the hard tissues of a tooth or group of teeth, injured or destroyed by trauma or disease. Restorative services/procedures intend to restore the function of a natural tooth.</p> <p>Anterior teeth include incisors and canines. Posterior teeth include premolars and molars.</p> <p>The number of tooth surfaces restored, i.e. mesial, occlusal (or incisal), distal, lingual, or vestibular (buccal or labial), is used to determine the appropriate procedure code. A one surface restoration for example, involves only one of the surfaces, while a two-surface restoration extends to two of the five surfaces. With a four-or-more-surfaces anterior restoration involving four tooth surfaces and the incisal angle is involved.</p> <p>Limitations on amalgam and resin-based composite restorations:</p> <p>(1) The reporting of two separate restorations of the same material (e.g., a MO and DO amalgam restoration) on the same tooth is appropriate. Some medical schemes however, have a clause in its dental plan(s) that restricts coverage of the same tooth surface, such as an occlusal, twice on the same day and may require the reporting of a MOD restoration instead of a separate MO and DO restoration.</p> <p>(2) The current NHRPL rates include direct pulp capping (code 8301) and rubber dam application (code 8304).</p>

I.	FIXED PROSTHODONTICS						
	<p>The branch of prosthodontics concerned with the replacement or restoration of teeth by artificial substitutes that are not readily removable.</p> <p>A prosthetic retainer (e.g., crown/inlay/onlay retainer) in this section is defined as a part of a bridge that attaches a pontic to the abutment tooth. A pontic is that part of a bridge which replaces a missing tooth or teeth. Each retainer and each pontic constitutes a unit in a bridge.</p> <p>Porcelain/ceramic retainers and pontics presently include all ceramic, porcelain and porcelain fused to metal retainers and pontics.</p> <p>Resin retainers and pontics and resin metal retainers and pontics include all reinforced heat and/or pressure-cured resin materials.</p> <p>Metal components include structures manufactured by means of conventional casting and/or electroforming.</p>						
	PONTICS						
	<p>Comment: Codes 8415, 8416, 8417 and 8418 include ovate pontic designs. The nomenclatures of the pontics have been revised to coincide with the nomenclature used for crowns, which improves accurate record keeping. A similar approach has been followed for crowns and inlays/onlays utilised as bridge retainers.</p>

	REMOVABLE APPLIANCE THERAPY						
	Removable indicates patient can remove; includes appliances for limited orthodontic treatment (e.g., partial treatment to open spaces or upright of a tooth) and minor orthodontic treatment to control harmful habits (e.g., thumb sucking and tongue trusting).						
8862	Ortho Tx - removable appliance	R 1 642,30		R 2 463,30		R 0,00	
8863	Ortho Tx - each additional removable appliance	R 825,40		R 1 237,90		R 0,00	
	Control of harmful habits						
	Includes removable and fixed appliances to control harmful habits (e.g., thumbs sucking and tongue thrusting).						
8870	Therapy to control harmful habits – removable appliance	R 1 642,30		R 2 463,30			
8871	Therapy to control harmful habits – fixed appliance						
	FUNCTIONAL APPLIANCE THERAPY						
	A removable functional appliance is an appliance with no fixed dental component which is designed to harness the forces generated by the muscles of mastication and the associated soft tissues of the oro-facial region. This appliance incorporates components which act on both the maxillary and mandibular arches and should be differentiated from a simple removable appliance including appliances incorporating an anterior and posterior bite plane.						
	Orthodontic treatment by means of a functional appliance is usually followed by comprehensive orthodontic treatment utilising fixed orthodontic appliances. When both phases of orthodontic treatment is provided by the same practitioner, the fees levied for treatment by means of the functional appliance, will be deducted from the fee quoted for comprehensive orthodontic treatment.
